

# Fiber Optic Accessories

## Cable Spillways

# BJ-2049

## Application

Cable Spillway™ protects fiber or cable from any sharp edges of EMT conduit while maintaining minimum bend radii preventing attenuation or crosstalk. It reduces installation costs by providing an alternative to a cable trapeze. Spillway allows easy passage of cables through wall, floors, or ceilings to comply with USEC fire-resistance requirements.

## Features

- Made of Fire Retardant ABS and Stainless Steel
- Maintains proper bend radii for fiber/cable
- Provides tie points for fire pillow retention
- Supports up to 100 lbs. of fiber/cable
- Easy Open clamping system
- Self fastening tie down system
- Split top allows adding to existing installations

## Specifications

Dimensions:	Four Inch Diameters
Construction:	Fire Retardant ABS
Color:	Blue

### Part Number

### Description

BJ-2049B

Fits 4" Diameter Conduit
